Re: Newcastle Fire Station, APN 040-179-001

Dear Mr. Herzer,

We have recently become aware of the above-referenced project. This is to inform you that Pacific Gas and Electric Company is a public utility and the certified carrier of electric energy serving the territory wherein this project is located.

Providing that any necessary rights of way can be obtained, service will be provided to your project in accordance with our Gas and/or Electric Rules No. 15 and 16. Copies of these rules are available upon request at our Auburn office or online at www.PGE.com

To date, there has been no action on the part of the California Public Utilities Commission to subject our residential or commercial rates to new or additional requirements. However, since all of our tariffs are subject to decisions of this Commission, you should be aware that service will be established under the provisions of the tariffs in effect when service is installed.

Upon receipt of an Application for Service, we may schedule a pre-engineering meeting, and at that time, determine the placement of the service and related equipment.

If you have any additional concerns or questions, please feel free to call (530) 889-5135.

Sincerely,

Carl Gordon
