We do have service in the area. Maybe just a matter of short hard line extension... that all depends on the project layout.

Thanks!

Evelyn,

We are in the early stages performing due diligence, so this project has not been designed yet. Early construction estimate would be next year. We will be sure to coordinate our design with you as it unfolds.

Does Wave Broadband have existing service at this location, or must it be extended?

Hi Phil,

Do you have a schedule when this Fire Station is going to be built? Do you have any pre-engineering meeting already set for this project? This meeting usually held with other utilities to discuss how to bring service to the new fire station. Please make sure to coordinate all the planning through me. I also need an AutoCAD 2000 of the site layout of your project. Please send the information directly to me.

If you have any questions, please feel free to call me.

Thanks!

John, as we discussed, please see attached location for the proposed fire station.

Thank you.
